TECHNICAL GUIDE

LEVOLOR®

Effective November 2018

18-0071-001

How To Measure Quickly and Accurately

INSIDE MOUNT (IM) INSTALLATION — For a beautiful framed look

- 1 MEASURE WIDTH**
Measure to the nearest $\frac{1}{8}$ in. between inside surfaces of window frame; at the top, middle, and bottom.
Record the narrowest width of the three.
- 2 MEASURE HEIGHT**
Measure to the nearest $\frac{1}{8}$ in. from inside surface at top of window to top of sill; at the left, middle, and right.
Record the tallest height of the three.
- 3 MEASURE DEPTH**
Measure exact depth of window casing making note of any obstacles i.e. handles, tracks or cranks that could interfere with the blind or shade function.
Use the shortest depth.

HELPFUL HINTS

Always use a metal tape measure as cloth may stretch

Measure your window – not your existing blind or shade

Measure each window separately even if they appear to be identical

Check depth to ensure shade will clear any obstacles and can accommodate headrail if flush mount is desired

If you prefer shade not to touch sill, deduct $\frac{1}{4}$ "

If there is no sill, measure height to point where shade is to reach

OUTSIDE MOUNT (OM) INSTALLATION — For increased light control and privacy

- 1 MEASURE WIDTH**
Measure to the nearest $\frac{1}{8}$ in. between outermost points where shade is to be placed.
Measurement should overlap each side of window frame by at least $1\frac{1}{2}$ in.
- 2 MEASURE HEIGHT**
Measure to the nearest $\frac{1}{8}$ in. from where top of shade will be located to top of sill, or measure to point of shade reach if no sill.

NOTE: Take all measurements to the nearest $\frac{1}{8}$ in. **DO NOT** take any deductions. The factory will make the necessary adjustments to help ensure your window covering operates smoothly.

Visit www.LEVOLOR.ca/how-to-measure for more measuring information

Window and Measuring Terminology

WINDOW COMPONENTS TERMINOLOGY

- Collectively, the sill and jambs are called the "window casement" or "frame".

INSIDE MOUNT

- Shade fits within window opening.
- Great for windows with beautiful trim.

OUTSIDE MOUNT

- Shade mounts outside window opening.
- Increased light control and privacy.

TWO SHADES ON ONE HEADRAIL

- Provides the clean appearance of a single shade with the ability to operate each shade independently.
- Can be mounted inside or outside.

For additional product information visit LEVOLOR.com/customroller

How to Measure Two Shades on One Headrail (2-on-1 Headrail)

INSIDE MOUNT (IM) INSTALLATION — For a beautiful framed look

1 MEASURE WIDTH

Total Shade Width — Measure to the nearest $\frac{1}{8}$ in. between inside surfaces of window frame; at the top, middle, and bottom.

Record the narrowest width of the three.

Left Shade Width — Measure the width that you want the left shade to cover.

Order this shade first when placing your order.

Right Shade Width — Measure the width that you want the right shade to cover.

2 MEASURE HEIGHT

Overall Shade Height — Measure to the nearest $\frac{1}{8}$ in. from inside surface at top of window to top of sill; at the left, middle and right.

Record the tallest height of the three.

3 MEASURE DEPTH

Measure exact depth of window casing making note of any obstacles i.e. handles, tracks or cranks that could interfere with the blind or shade function.

Use the shortest depth.

OUTSIDE MOUNT (OM) INSTALLATION — For increased light control and privacy

1 MEASURE WIDTH

Overall Shade Width — Measure to the nearest $\frac{1}{8}$ in. between outermost points where shade is to be placed.

Add an additional 3 in. to 6 in. to total width for maximum privacy.

Left Shade Width — Measure the width that you want the left shade to cover.

Order this shade first when placing your order.

Right Shade Width — Measure the width that you want the right shade to cover.

2 MEASURE HEIGHT

Overall Shade Height — Measure to the nearest $\frac{1}{8}$ in. from where top of shade will be located to top of sill, or measure to point of shade reach if no sill.

2-ON-1 HELPFUL NOTES

- Available in Continuous Cord Loop Only.
- Each shade operates separately.
- There will be a gap between the fabric on the left and right shades to operate independently.
- Light gap is $\frac{3}{4}$ in. — (Light Gap is the space needed between the 2 shades to ensure proper operation.)
- Left shade controls are on the left side and the right shade controls on the right side.
- Always use a metal tape measure as cloth may stretch.
- Take all measurements to the nearest $\frac{1}{8}$ in. DO NOT take any deductions.
- The factory will make the necessary adjustments to help ensure your shade operates smoothly.

Fabric and Solar Roller Specifications and Critical Dimensions

Use tables below to assist in purchasing, product size availability and product specifications. Please note the term "Cord Loop", in these pages, refers to a "beaded chain loop."

Continuous Cord Loop Cord Lengths	
Ordered Drop (inches)	Length (feet)
0-24	1
24-48	2
48-72	3
72-96	4
96-120	5

Beaded metal chain length is $\frac{2}{3}$ of total shade length.
Metal chains are provided in colors white, cream, copper, metal, gunmetal, black.

Installation Brackets			
Your order will include the correct number of installation brackets for your shade width, as shown in the table below			
	Number of Brackets		
Shade Width (inches)	Continuous Cord Loop	Cordless	Motorized
Up to 38	2	2	3
38 to 68	3	3	4
68 to 82	4	4	5
82 to 106	5	5	6
106 to 144	6	N/A	7

Standard Factory Deductions from Ordered Width		
DO NOT make any deductions to your measurements		
	Inside Mount	Outside Mount
No Valance	Up to $\frac{1}{4}$ "	0"
Standard Valance	Up to $\frac{1}{4}$ "	0"
Cassette Valance	Up to $\frac{1}{4}$ "	0"

Cassette valance will arrive with fabric insert. This cannot be overridden.

Light Gaps (Fabric width is narrower than the finished shade)			
		Light Gaps Per Side (inches)	
Operating System	Lift Control	Inside Mount	Outside Mount
Continuous Cord Loop	Left or right control, right is standard	Up to $\frac{3}{4}$ "	0"
Cordless	Handle operates shade	Up to $\frac{9}{16}$ "	0"
Motorized	Right control only	Up to $\frac{5}{8}$ "	0"

Cassette valance typically has the largest light gap.
For standard 2-on-1 shades, controls will be located on the left side of the left shade and the right side of the right shade

Single Shade Critical Dimensions (inches)				
	Min Width	Max Width	Min Height	Max Height
Continuous Cord Loop	12	144	12	120
Cordless	18 $\frac{1}{8}$	96	12	120
Motorized	16	144	12	120

2-on 1-Critical Dimensions (inches)				
	Min Width	Max Width	Min Height	Max Height
Continuous Cord Loop	32	144	12	120
Cordless	N/A	N/A	N/A	N/A
Motorized	N/A	N/A	N/A	N/A

Mounting Depths Requirements							
		Motorized - No Valance		Motorized - Cassette Valance			
	No Valance (inches)	Standard Valance (inches)	Cassette Valance (inches)	Standard Battery (inches)	Satellite Battery (inches)	Standard Battery (inches)	Satellite Battery (inches)
Minimum Installation Depth	1 $\frac{1}{2}$	1 $\frac{1}{2}$	1 $\frac{3}{4}$	N/A	1 $\frac{1}{2}$	3 $\frac{1}{2}$	2 $\frac{1}{8}$
Flush Mount Installation Depth*	2 $\frac{1}{2}$	3 $\frac{1}{4}$	Med. 3 Lg. 3 $\frac{5}{8}$	N/A	2 $\frac{1}{2}$	4 $\frac{1}{4}$	3
Maximum Fabric Width Deduction	1 $\frac{1}{4}$	1 $\frac{1}{4}$	1 $\frac{1}{2}$	1 $\frac{1}{4}$	1 $\frac{1}{4}$	1 $\frac{1}{2}$	1 $\frac{1}{2}$
Width Tolerance	$\frac{1}{16}$	$\frac{1}{16}$	$\frac{1}{16}$	$\frac{1}{16}$	$\frac{1}{16}$	$\frac{1}{16}$	$\frac{1}{16}$
Height Tolerance	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$
Valance Height	N/A	3 $\frac{1}{2}$	Med. 3 Lg. 3 $\frac{1}{2}$	N/A	N/A	Med. 3 Lg. 3 $\frac{1}{2}$	Med. 3 Lg. 3 $\frac{1}{2}$
Extension Bracket Projection	1 $\frac{1}{8}$	1 $\frac{1}{8}$	3	N/A	N/A	3	3

*Minimum surface area needed to mount the product flush with the window frame.

For additional product information visit LEVOLOR.com/customroller

Banded Roller Product Specifications and Critical Dimensions

Use tables below to assist in purchasing, product size availability and product specifications. The bottom bar is wrapped in fabric by default. This cannot be overridden.

Continuous Cord Loop Cord Lengths	
Ordered Drop (inches)	Length (feet)
0-24	1
24-48	2
48-72	3
72-96	4
96-120	5

Cord length is approximately 1/2 the length of the shade.
Fabric cords are provided in cream, taupe, gray, ivory, graphite.

Standard Factory Deductions from Ordered Width		
DO NOT make any deductions to your measurements		
	Inside Mount	Outside Mount
Cassette Valance	Up to 1/4"	0"

Cassette valance will arrive with fabric insert. This cannot be overridden.

Single Shade Critical Dimensions (inches)				
	Min Width	Max Width	Min Height	Max Height
Continuous Cord Loop	12	108	12	120
Cordless	24 1/8	63	12	84
Motorized	17	108	12	120

2-on 1-Critical Dimensions (inches)				
	Min Width	Max Width	Min Height	Max Height
Continuous Cord Loop	32	108	12	120
Cordless	N/A	N/A	N/A	N/A
Motorized	N/A	N/A	N/A	N/A

Mounting Depths Requirements			
	Motorized – Cassette Valance		
	Cassette Valance (inches)	Standard Battery (inches)	Satellite Battery (inches)
Minimum Installation Depth	2 1/8	3	2 1/8
Flush Mount Installation Depth	3	4 1/4	3
Maximum Fabric Width Deduction	1 1/2	1 1/2	1 1/2
Width Tolerance	1/16	1/16	1/16
Height Tolerance	1/8	1/8	1/8
Valance Height	Med. 3 Lg 3 1/2"	Med. 3 Lg 3 1/2"	Med. 3 Lg 3 1/2"
Extension Bracket Projection	N/A	3	3

Installation Brackets			
Your order will include the correct number of installation brackets for your shade width, as shown in the table below			
Shade Width (inches)	Number of Brackets		
	Continuous Cord Loop	Cordless	Motorized
Up to 38	2	2	3
38 to 68	3	3	4
68 to 82	4	N/A	5
82 to 108	5	N/A	6

Light Gaps (Fabric width is narrower than the finished shade)			
Operating System	Lift Control	Light Gaps Per Side (inches)	
		Inside Mount	Outside Mount
Continuous Cord Loop	Left or right control, right is standard	Up to 1/2	0
Cordless	Handle operates shade	Up to 3/8	0
Motorized	Right control only	Up to 1/2	0

Cassette valance typically has the largest light gap.
For standard 2-on-1 shades, controls will be located on the left side of the left shade and the right side of the right shade.
The tolerance for vane alignment is 1/8".

Motorization and Remote Control Overview

FEATURES

LEVOLOR® remote control motorization allows you to control light and privacy with a simple click.

- Use the "Favourite" feature to set up to 3 shading groups to a preferred position
- "ALL" feature is used to select all programmed groups for simultaneous operation
- Multiple shades can be operated simultaneously or individually

BENEFITS

- Added safety for children and pets
- Perfect for large or hard to reach windows
- Clean look for your window

Battery Specifications – Motorized Only		
Battery	Type	Qty. Included
Standard Battery Pack	AA 1.5V Alkaline	12
Satellite Battery Pack	AA 1.5V Alkaline	12
Standard Remote	AAA Alkaline	2
Note: Lithium and rechargeable batteries are not recommended.		

STANDARD BATTERY PACK

A tube of batteries that is connected to and installed behind the head rail to supply power to the LEVOLOR motorized operating system.

- Batteries can be changed without removing the window covering from the window
- Each battery tube uses 12 AA 1.5V alkaline batteries, all batteries are included with initial order
- Battery life varies depending on usage
- Replace batteries when the window covering(s) begin to operate slowly
- Lithium and rechargeable batteries are not recommended
- Additional battery packs are available at time of order, if desired

Note: A single standard battery pack or a satellite battery pack will fit with any shade. There are no size limitations based on battery pack selection.

SATELLITE BATTERY PACK

An optional power source that allows the battery pack to be mounted on the top of a head rail, next to molding or under the sill. It is the best choice when the window covering is mounted in a high window, restricting access to the battery pack. Must be selected at time of order.

- Available in 4 wire lengths: 15 inches, 4 feet, 10 feet, 20 feet
- Satellite battery pack cover can be painted
- Each battery tube uses 12 AA 1.5V alkaline batteries, all batteries are included with initial order
- Battery life varies depending on usage
- Replace batteries when the window covering(s) begin to operate slowly
- Satellite battery pack cover can be painted

Cleaning and Care

All LEVOLOR Roller Shades have multiple cleaning options.

Note: Improper cleaning may void warranty

DUSTING

Use a feather duster for regular cleaning.

VACUUMING

Use a low suction vacuum with a brush-type cleaner attachment; stroke lightly over the shade to clean.

FORCED AIR

Blow away dirt and debris using clean compressed air.

SPOT-CLEANING/STAIN REMOVAL AT HOME

Use warm water and a mild soap, like Woolite® or Scotchgard®, if needed.

PROFESSIONAL INJECTION/EXTRACTION CLEANING

Call local on-site blind/shade cleaner that injects a cleaning solution into the fabric and extracts the dirty solution at the same time. The service is typically performed at home so you do not need to remove your window treatments.
